

The Game of Life

1. The Rules

2. Some Patterns

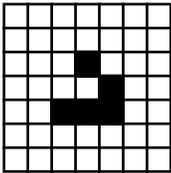

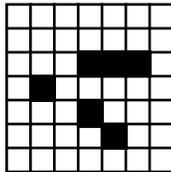

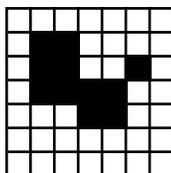

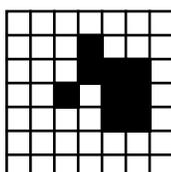

3. The Ultimate Natural Law for the Game of Life

		Sum of Neighbor States								
		0	1	2	3	4	5	6	7	8
Current State	1	0	0	1	1	0	0	0	0	0
	0	0	0	0	1	0	0	0	0	0

This table has 18 different boxes. There are two ways to fill in each box (either with 0 or with 1). So there are $2^{18} = 262144$ ways to fill in this table.

4. Different Versions of the Game of Life

Rule Description and Name	Moving Pattern	Comments																																									
Rule B3/S23 (John Conway's Life) <table border="1" style="margin-top: 10px;"> <thead> <tr> <th colspan="2" rowspan="2"></th> <th colspan="9">Sum of Neighbor States</th> </tr> <tr> <th>0</th> <th>1</th> <th>2</th> <th>3</th> <th>4</th> <th>5</th> <th>6</th> <th>7</th> <th>8</th> </tr> </thead> <tbody> <tr> <th rowspan="2">Current State</th> <th>0</th> <td>0</td> <td>0</td> <td>0</td> <td>1</td> <td>0</td> <td>0</td> <td>0</td> <td>0</td> <td>0</td> </tr> <tr> <th>1</th> <td>0</td> <td>0</td> <td>1</td> <td>1</td> <td>0</td> <td>0</td> <td>0</td> <td>0</td> <td>0</td> </tr> </tbody> </table>			Sum of Neighbor States									0	1	2	3	4	5	6	7	8	Current State	0	0	0	0	1	0	0	0	0	0	1	0	0	1	1	0	0	0	0	0		Very rich physics; has patterns that are universal computers; has self-reproducing patterns.

A degenerate world.
